

(附件一)

## **Fellow in Training (FIT) Board Review Course of Interventional Electrophysiology**

110.03.13 初版

### **A. Paroxysmal Supraventricular Tachycardia**

1. Differential diagnosis of tachycardia beyond electrophysiological Study.
2. Electrophysiological Study and Ablation of Atrioventricular Nodal Reentrant Tachycardia (AVNRT).
3. Electrophysiological Study and Ablation of Atrioventricular Reentrant Tachycardia (AVRT) PART I.
4. Electrophysiological Study and Ablation of Atrioventricular Reentrant Tachycardia (AVRT) PART II.
5. Electrophysiological Study and Ablation of Non-reentrant Type Atrial Tachycardia.
6. Electrophysiological Study and Ablation of Macroreentry Atrial Tachycardia and Atrial Flutter.
7. Atrial Fibrillation.

### **B. Bradycardia and PPM**

1. Basic Concept and Electrophysiological Evaluation of Sinus Nodal and Atrioventricular Nodal Function.
2. Pacemaker Overview.
3. Pacemaker Lead Management and Implantation.
4. Troubleshooting and Pacemaker Lead Extraction.
5. Implantable Cardioverter/Defibrillator (ICD), Cardiac Resynchronization Therapy (CRT) and CRTD consideration.

### **C. Unknown ECG**

### **D. Ventricular Arrhythmia**

1. VPCs and Cardiomyopathy.
2. Idiopathic Ventricular Tachycardia.
3. Reentrant Type Ventricular Tachycardia and Concept of Entrainment.
4. Ventricular Arrhythmia in Structure Heart Disease.
5. Other Ventricular Arrhythmias, Triggered Activity and Automaticity.
6. Recent Update of Ventricular Arrhythmia.
